This table highlights the importance of being consistent with your use of keywords. To improve the chance of ranking high in search results with a specific keyword, you should use the most important keywords consistently in your content, title, description, H titles, internal links anchor text and backlinks anchor text.

Page Level SEO Recommendations

High Priority

There were no tags found on your site. You should add tags around the key phrases you want to target.

Your social share count is low. You can improve the rank of your site by creating high-quality content that people want to consume and share.

You need to increase your back links, you should consider creating an email outreach program.

Medium Priority

We noticed that your tag is too long. It's best to keep your meta description between 150 and 160 characters.

Title tags are an important on-page factor for SEO. Your title tags should contain fewer than 70 characters. This is the limit Google displays in search results.

Low Priority

We found tags that don't include the alt attribute. Since search engines can't see the image, including an alt tag helps search engines know what you are showing on your site.

The majority of the keywords are not found in the site title. Make sure you place your most descriptive keywords in the site title.

The majority of the keywords are not found in the meta description. Make sure you place your most descriptive keywords in the meta description.

The majority of the keywords are not found in heading tags. Make sure you place your most descriptive keywords in heading tags.
